Catalogue 2019

Tools for the toughest demands

Dear Festool customers,

what motivates us to tirelessly continue developing our products year after year? The same thing that spurs you on: The passion for our trade.

This year, we have once again improved established products and developed new products with this passion. A myriad of clever details help move your working day along: On the new CT MINI and CT MIDI mobile dust extractors, for example, you can change the filter bags from the outside without having to open the extractor – saving you valuable time! And our new cordless insulating material saw allows you to cut insulating materials to size in next to no time without a cord.

We would like to provide you with another intelligent tool in the form of our new catalogue. This gives you access to all of our products, accessories and services at any time.

We hope you enjoy using it.

New Festool products for 2019.

Intelligent right down to the smallest detail.

Low weight, compact dimensions and a host of innovative details - the new CTL MINI and CTL MIDI compact extractor impresses in all aspects. It has intuitive touch operation, a smooth suction hose and a level storage area for tools and consumables. Manual dedusting and being able to replace the main filter from the outside ensure long-lasting work that protects your health.

>> Page 184

Simply flexible.

Smooth, elastic and extremely robust: the new suction hose impresses with improved handling and a longer service life. It glides over any edges and ensures improved suction thanks to its conical geometry. Clever extra benefits: The new CLEANTEC dust-extraction sleeve means the ends of the hose can be connected to each other to transport it cleanly or to extend the suction hose, depending on what you need.

>> Page 14

Patented talent.

The ISC 240 cordless insulating material saw revolutionises the sawing of insulating materials. Whether on a roof, scaffolding or on the ground. Whether working with mineral fibre, natural fibre or polyurethane insulation boards. Conveniently save energy, time and the need for rework, even when cutting insulating materials to size.

>> Page 57

The perfect connection. Now even more versatile.

The new basic structure connectors and furniture connectors for the DOMINO DF 500 joining machine enable stable yet detachable furniture designs. A clever invention which simplifies your work during manufacturing, set-up and disassembly tasks in the workshop and on customer premises.

>> Page 312

The portable workshop is exactly what its name promises: Ideal working conditions on any construction site. Its intelligent design guarantees that it can be transported, set up and disassembled with ease. A few steps are all that is required to turn the sophisticated, compact unit into a stable workstation, where all tools are in their intended position ready for use. Just like in your own workshop.

>> Page 398

Reinforcement for the mobile dust extractor.

The CT pre-separator can deal with large quantities of dust. It can separate and collect up to 95% of mineral and coarse dust. This takes the strain off the main filter and keeps the suction power high thanks to intelligent use of cyclone technology.

Pendulum jigsaws

TRION PS / PSB 300

Powerful and consistently accurate.

Rapid cutting progress and superior precision are just two of the impressive characteristics of the TRION PS 300. The patented three-way saw blade guide with parallel adjustable carbide jaws guarantees straight precision cuts.

Ideal for flexible use.

- > Patented three-way saw blade guide for cutting precise angles
- > FastFix rapid-change system for easy saw blade changes
- > Compatible in the system integrated in the CMS system as a semi-stationary saw
- > High-quality drive components give longer service life

Plunge-cut saw

TS 55 R

Even more precise. Flat body.

Many of the standard features of today's portable circular saws originated from the TS 55. The TS 55 is now starting the next chapter in its success story with a wide range of innovations such as an ultra slimline housing for even greater flexibility, a recently developed guide wedge for even greater safety and precision and many other ideas that make the TS 55 R the best plunge-cut saw we have ever built.

The best plunge-cut saw we have ever built.

- > Slimline housing for maximum flexibility and close proximity to the wall (12 mm)
- > Angle adjustment with undercut function from -1 to 47°

More independence. More precision.

For more mobility in timber construction: The cordless HKC 55 portable circular saw with FSK cross cutting guide rail demonstrates what saws are now capable of achieving on roofs – without sockets and cable pulling. Connecting this to the FSK cross cutting guide rail instantly produces a portable and easily manageable compound mitre saw system for accurate and precisely angled cuts.

HK 85

The timber construction all-rounder.

Technical data

- > High-torque 2300 W motor with power electronics ensures constant power when sawing
- > Safe and easy handling thanks to the cutting depth adjustment with plunge function, pendulum hood remote control and guide wedge
- > Angle adjustment with central clamping mechanism from 0 to 60 degrees
- > Using the conversion kit accessories, the portable circular saw can become a groove cutter

Cordless insulating-material saw

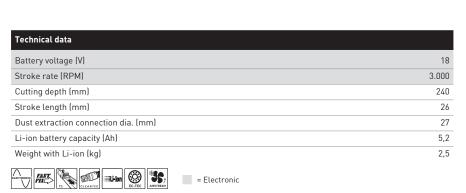

ISC 240

Brushless EC-TEC motor for a long service life and a high level of efficiency

The revolution in insulating-material saws.

- > Perfectly coordinated cutting sets for precise and fast cutting of flexible mineral and natural fibre insulating materials as well as PUR insulating materials
- > Mobile, fast and saves effort without a cable: With a powerful 18 V Li-ion battery and brushless EC-TEC motor.
- > For cutting material efficiently: With the guide rail and angle stop (available in a set or as accessories), reproducible angled cuts can be made with precise dimensions
- > Work without tiring thanks to a perfectly balanced design and low weight for maximum comfort when working, even in one-handed operation

Fast. Precise. Mobile.

Whether you are working freehand or with a guide rail and stop pin system; on a roof, scaffolding or on the ground; with insulating materials made of mineral fibres or natural fibres or polyurethane insulation boards – the ISC 240 offers amazing mobility, versatility and efficiency, making it the ideal solution for anyone wishing to insulate housing with minimum effort.

The Festool system. **Everything in view.**

Because things work better when everything fits together: Festool saws fit perfectly into the system. For example, the guide rails are compatible both with pendulum jigsaws and plunge-cut saws. Bevels can be used for multiple functions and a hand-guided saw can also be used in a semi-stationary configuration with the CMS Compact Module System.

	Parallel side fence PA-A-HK 85	for HK 85, bilateral offset parallel stop, in carton	574670
5	Guide-rails	see the "Organising your workplace" chapter from page 388	
6	Groove unit VN-HK85 130x16-25	for HK 85, routing transverse and longitudinal grooves; routing depth 0-35 mm and routing width adjustable by 16-25 mm, reversible blades HW-WP 14x14x2, adjustable groove cutter diameter 130 x 16-25 mm, protective cover (fixed), protective cover (moveable), Clamping flange, Counter flange, Spacer, dust extraction connection dia. 36 mm, weight 0,9 kg, in SYSTAINER SYS 1 T-LOC	200163
7	Reversible blade HW-WP 14x14x2/12	for HK85 adjustable groove cutter, dimensions (L x W x H) 14 x 14 x 2 mm, qty. in pack 12 Units, in self-service display pack	574671

HK 132

Accessories for carpentry portable circular saws HK 132

	Denomination	Explanation	Order no.
1	Parallel side fence PG-HK 132	for HK 132, CSP 132, for using HK 132 E/W with guide rails, type GC 2000/3000, in carton	769538
2	Guide rail GC 2000	for HK 132, CSP 85/60, CSP 132, CSP 165, CCP 380, NRP 90, 2000 mm long, in carton	769669
	Guide rail GC 3000	for HK 132, CSP 85/60, CSP 132, CSP 165, CCP 380, NRP 90, 3000 mm long, in carton	769670
3	Angle stop GC 1000-WA	for HK 132, CSP 85/60, CSP 132, CSP 165, CCP 380, NRP 90, angle indicator with 1000 mm guide rail and gauge marker, Angle stop, for variable angle adjustment up to 90° on both sides, With gauge marker for adjusting each mitre cut to scribe mark, in carton	769671
4	Planing set NS-HK 250x50	for HK 132, CSP 132, carbide pre-cutter 14 x 14 x 2.0 mm, carbide reversible blade 50 x 12 x 1.5 mm, protective cover, 1 movable guard with remote control, clamping rails, planing head dia. 250 mm, planing width 50 mm, planing depth 0-80 mm, drilling 30 mm, weight 6,8 kg, in carton	769539
5	Milling set RS-HK 160x80	for HK 132, CSP 132, milling head Ø 160 x 80 mm, 3 x carbide reversible blade 80 x 13 x 2.2 mm, carbide pre-cutter 14 x 14 x 2.0 mm, protective cover, 1 movable guard with remote control, clamping rails, planing head dia. 160 mm, planing width 80 mm, planing depth 0-38 mm, drilling 30 mm, weight 7,1 kg, in carton	769540
6	Reversible cutter blade CT-HK HW 50x12x1,5/3	for planer head NS-HK 250 x 50 and flattening head Ø 260 x 50, NS-CSP 250 x 50, HK 132, NRP 90, qty. in pack 3 Units, dimensions 50 x 12 x 1,5 mm, in self-service display pack	769544
	Reversible cutter blade CT-HK HW 80x13x2,2/3	for notch cutter head RS-HK 160 x 80, RS-CSP 160 x 80, HK 132, CSP 132 E, qty. in pack 3 Units, dimensions 80 x 13 x 2,2 mm, in self-service display pack	769543
7	Pre-cutter CT-HK HW 14x14x2/6	for planer and notch cutter head, for HK 132, CSP 132, NRP 90, qty. in pack 6 Units, dimensions 14 x 14 x 2 mm, in self-service display pack	769542
8	Circular saw blades	from page 84	

	Denomination	Explanation	Order no.
1	Bevel SM-KS	for KS 60, KS 120, bevel for transferring angles to the circular cross-cut saw, for interior and exterior angles, dissecting angle is generated automatically, no calculations, in self-service display pack	200127
2	Trimming attachment KA-UG-KS 60-L	for KS 60, for use in conjunction with the Festool UG-KAPEX KS 60 base frame, adjustable stop, telescopic slide-out scale, fold-out pedestal and carry case, measurement scale, length of extension arm (without telescope) 1.480 mm, max. meas. length 2.400 mm, weight 4,6 kg, in carton	201907
3	Trimming attachment KA-UG-KS 60-R	for KS 60, for use in conjunction with the Festool UG-KAPEX KS 60 base frame, adjustable stop, telescopic slide-out scale, fold-out pedestal and carry case, measurement scale, length of extension arm (without telescope) 1.480 mm, max. meas. length 2.400 mm, weight 4,6 kg, in carton	201908
	Trimming attachment KA-UG-KS 60-R/L	for KS 60, for use in conjunction with the Festool UG-KAPEX KS 60 base frame, consisting of KA-UG-L and KA-UG-R, adjustable stop, telescopic slide-out scale, fold-out pedestal and carry case, measurement scale, length of extension arm (without telescope) 1.480 mm, max. meas. length 2.400 mm, in carton	201909
4	Fastening clamp FSZ 120	for FS/2, MFT, solid steel version, clamping width 120 mm, qty. in pack 2 Units, in self-service display pack	489570
5	Increase A-SYS-KS 60	for KS 60, intermediate bases for elevating the KS 60 to the height of a SYSTAINER SYS 1 T-LOC and Classic, Table height = Systainer: Long workpieces can be comfortably supported on the floor while working, for retrofitting the KS 60, items already included with the KS 60 set variants, in carton	500121
6	Spot lighting SL-KS 60	for KS 60, LED spot lighting for precisely highlighting the cutting line and optimal visibility of the scribe mark, for retrofitting the KS 60, items already included with the KS 60 set variants, in self-service display pack	500120
7	Underframe UG-KA-KS 60 Set	for KS 60, simple folding in for transport, (KA-UG-R and KA-UG-L trimming attachments incl. in the contents), work height 900 mm, weight 21 kg, in carton	202055
	Underframe UG-KS 60	for KS 60, simple folding in for transport, work height 900 mm, weight 13 kg, in carton	200129
8	Adapter plate UG-AD-KS 60	for KS 60, adapter plate and saw blade holder for attaching the KS 60 to the UG-KAPEX KS 60 base frame, in carton	202056
9	Multifunction table MFT KAPEX	used as a base frame for the KAPEX, clamping kit SZ-KS required for fixing, table with perforated top and foldaway legs, table dimensions 869 x 581 mm, work height/with foldaway legs 180 mm, working height with legs 790 mm, load capacity 120 kg, weight 19 kg, in carton	495465
10	Clamping kit SZ-KS	for KS 60, KS 88, KS 120, for tightening the KS on the multifunction table, in self-service display pack	494693
11	Circular saw blades	from page 84	

	Denomination	Explanation	Order no.
1	Bevel SM-KS	for KS 60, KS 120, bevel for transferring angles to the circular cross-cut saw, for interior and exterior angles, dissecting angle is generated automatically, no calculations, in self-service display pack	200127
2	Trimming attachment KA-UG-KS 120-L	for KS 120, KS 88, for use in conjunction with the Festool UG-KAPEX KS 120 base frame, measurement scale, adjustable stop, telescopic slide-out scale, fold-out pedestal and carry case, length of extension arm (without telescope) 1.480 mm, max. meas. length 2.400 mm, weight 4,6 kg, in carton	497353
	Trimming attachment KA-KS 120-L	for KS 120, KS 88, simple extraction and rolling out of measuring tape thanks to telescopic mechanism, only compatible with crown stop AB-KS, for use in conjunction with a Festool multifunction table [MFT] or a work table with a table height of 790 mm, adjustable stop, trimming stop, measurement scale, adjustable legs, total length 1.280 – 2.070 mm, cutting length 380 – 2.300 mm, in carton	495969
3	Trimming attachment KA-UG-KS 120-R	for KS 120, KS 88, for use in conjunction with the Festool UG-KAPEX KS 120 base frame, measurement scale, adjustable stop, telescopic slide-out scale, fold-out pedestal and carry case, length of extension arm (without telescope) 1.480 mm, max. meas. length 2.400 mm, weight 4,6 kg, in carton	497352
	Trimming attachment KA-KS 120-R	for KS 120, KS 88, simple extraction and rolling out of measuring tape thanks to telescopic mechanism, only compatible with crown stop AB-KS, for use in conjunction with a Festool multifunction table (MFT) or a work table with a table height of 790 mm, adjustable stop, measurement scale, adjustable legs, trimming stop, total length 1.280 – 2.070 mm, cutting	495968

Accessories for CS 50 EBG trimming saw

	Denomination	Explanation	Order no.
1	Extension table VL	for CS 50, CMS-GE, simple fitting, folds away, for safe support of long workpieces when sawing to width, enlarges the support surface by 405 mm, dimensions 375 x 454 mm, dimensions length x width 375 x 454 mm, in carton	492092
2	Support AF	for CS 50, CMS-GE, support for both side use, supports workpieces while cutting, enlarges the support surface by 300 mm, dimensions length x width 662 x 390 mm, in carton	492242
3	Extension table VB	for CS 50, with adjustable dimension scale, extends the support area by 410 mm, max. working width longitudinal 610 mm, dimensions length x width 664 x 438 mm, in carton	492090
	Extension table VB-CMS/CS 50	for CS 50, CMS-GE, dummy plate, foldaway legs, dimensions length x width 664 x 480 mm, in carton	495531
4	Trimming attachment CS 70 KA	for CS 70 and CS 50, removable, with support, bearing surface, tape measure and adjustable stop, simple extraction and rolling out of measuring tape thanks to telescopic mechanism, length 1.200 – 2.050 mm, in carton	488063
5	Adjustable stop KA-AR	for CS 50, CS 70, for positioning workpieces on trimming attachment CS 70 KA, Basis KA 100/200 and KA-KS L/R, in self-service display pack	488560
6	Stopper LA-CS 50/CMS	for CS 50, CMS-GE, with fine adjustment and rear clamp, can be operated from front, with moveable stop profile for precise and safe longitudinal cuts, in carton	574796
7	Sliding table ST	for CS 50, CMS-GE, for MFT 3-VL, max. working width for trimming cuts 830 mm, in carton	492100
8	Angle stop WA	for CS 70, CS 50, CMS-GE, for work requiring 2 stops, in carton	574797
9	Adjustable stop WA-AR	for CS 50, CS 70, to stop workpieces on trimming attachment CS 70 WA, CS 50 WA and Basis WRA 500, in self-service display pack	491712
10	Splinter guard CS 50 SP/10	for CS 50, for splinter-free cut edges on both sides, qty. in pack 10 Units, in self-service display pack	492241
11	Roller stand RB	for all semi-stationary devices (CS/KS/CMS), may be used with the CS 50, CS 70, CB 120, Basis Plus System, CMS-GE, multifunction table, to use longer workpieces for longitudinal sections and cross sections and cutting and grinding work, height adjustable 630 – 1.000 mm, in carton	488711
12	Foldaway legs CS 50 KB	for CS 50, makes two work heights possible, foldaway legs for the extension of the CS 50 floor version, in carton	575671
13	Dust extraction set CS 70 AB	for CT/CTM, comprising: dust extraction hose D27x2.0 m, dust extraction hose D36x1.0 m, Y terminal, can be used with Basis, CS 70, CS 50 and CMS, dust extraction with MINI/MIDI only possible in combination with adapter hose 499196, diameter 27 /36 mm, in carton	488292
14	Saw blade holder SGA	for CS 50, CMS-GE, for safe and space-saving storage of up to 4 saw blades (max. Ø 190 mm) and up to 3 splinterguards (not included in contents), in carton	492228
15	Circular saw blades	from page 84	

Accessories for CS 70 EBG trimming saw

	Denomination	Explanation	Order no.
1	Extension table CS 70 VL	for CS 70, simple fitting, folds away, for safe support of long workpieces when sawing to width, extends the support area by 580 mm, dimensions length x width 525 x 522 mm, in carton	488061
2	Extension table CS 70 VB	for CS 70, with adjustable dimension scale, easy and quick to assemble and dismantle, for safe and precise width sawing, extends the support area by 411 mm, max. working width longitudinal 680 mm, dimensions length x width 773 x 435 mm, in carton	488060
3	Trimming attachment CS 70 KA	for CS 70 and CS 50, removable, with support, bearing surface, tape measure and adjustable stop, simple extraction and rolling out of measuring tape thanks to telescopic mechanism, length 1.200 – 2.050 mm, in carton	488063
4	Adjustable stop KA-AR	for CS 50, CS 70, for positioning workpieces on trimming attachment CS 70 KA, Basis KA 100/200 and KA-KS L/R, in self-service display pack	488560
5	Stopper CS 70 LA	for CS 70, MFT/3-VL, with fine adjustment and rear clamp, can be operated from front, with moveable stop profile for precise and safe longitudinal cuts, in carton	488062
6	Sliding table CS 70 ST	for CS 70, for sawing boards, easy and quick to assemble and dismantle, 2 x supporting legs, stop ruler with additional clamp, max. working width for trimming cuts 920 mm, in carton	488059
7	Sliding table CS 70 ST 650	for CS 70, easy and quick to assemble and dismantle, max. working width for trimming cuts 650 mm, in carton	490312
8	Angle stop WA	for CS 70, CS 50, CMS-GE, for work requiring 2 stops, in carton	574797
9	Adjustable stop WA-AR	for CS 50, CS 70, to stop workpieces on trimming attachment CS 70 WA, CS 50 WA and Basis WRA 500, in self-service display pack	491712
10	Transport rollers CS 70 TR	for CS 70, can be fitted to foldaway legs, for simple and comfortable transportation, in carton	488064
11	Roller stand RB	for all semi-stationary devices (CS/KS/CMS), may be used with the CS 50, CS 70, CB 120, Basis Plus System, CMS-6E, multifunction table, to use longer workpieces for longitudinal sections and cross sections and cutting and grinding work, height adjustable 630 – 1.000 mm, in carton	488711
12	Splinter guard CS 70 SP /10	for CS 70, for splinter-free cut edges on both sides, qty. in pack 10 Units, in self-service display pack	490340
13	Dust extraction set CS 70 AB	for CT/CTM, comprising: dust extraction hose D27x2.0 m, dust extraction hose D36x1.0 m, Y terminal, can be used with Basis, CS 70, CS 50 and CMS, dust extraction with MINI/MIDI only possible in combination with adapter hose 499196, diameter 27 /36 mm, in carton	488292

New versatility for perfect cuts.

Whether you require speed for straight cuts or precision in tight curves. In wood, plastic, building materials or metal. With cross-set or sanded teeth, a small or large pitch, made from HCS tool steel or carbide-tipped. No matter what you want to cut, a glance at the optimised application overview of Festool's new range of jigsaw blades will help you find the correct saw blade right away.

WOOD

For outstanding results in wooden materials with high-grade HCS tool

PLASTICS

Plastic materials

Specially designed for excellent cutting results in virtually all plastics.

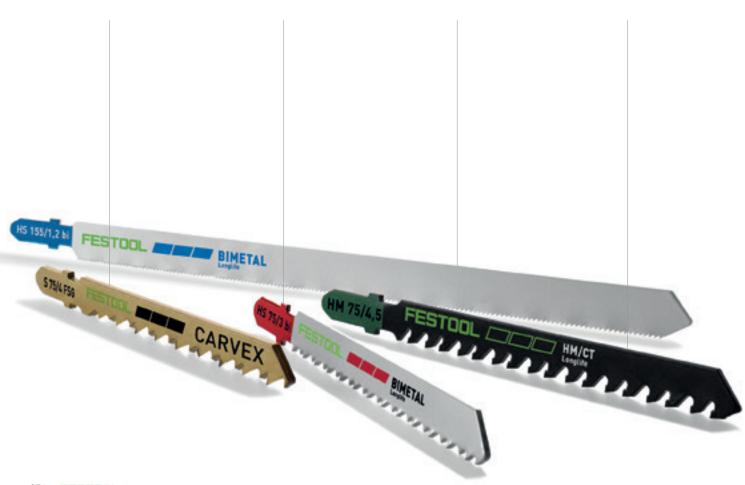

METAL

Rippled basic form made from HCS bimetal - ideal for machining metals such as aluminium and

BUILDING MATERIALS

Building materials

Carbide-tipped for the longest service life even with abrasive

Tips for setting the jigsaw correctly depending on the application.

Speed control

High speeds in settings 4–6 are ideal for machining soft, temperature-resistant materials such as wood. Low speed settings of 1–3 are recommended for temperature-sensitive plastics such as acrylic glass or PET in order to avoid smearing and for metals and building materials in order to minimise jigsaw blade wear and the production of dust.

Pendulum stroke setting

A higher pendulum stroke makes it faster and easier for the jigsaw to work through the material, but it usually results in significant splintering. A low or deactivated pendulum stroke ensures low-splinter, accurate cuts at a low working speed and is therefore ideal for precise adjustment work and curved cuts.

Material		Saw blade	Application	Speed recommendation	Pendulum stroke recommendation
		Basic	For quick cuts in wood where high precision is not required.	4-6	
		Universal	The universal blade for perpendicular cuts fundamentally encompasses all relevant applications involving wood. Also ideal in combination with the Festool guide rail.	4-6	
WOOD	NEW	Straight Cut	For highly precise perpendicular cuts thanks to extremely sharp Japanese teeth – the fibres are firstly scored, then cut through cleanly.	4-6	Min. for high precision Max. for high speed
	NEW	Curves	Ideal for curves – even extremely tight radii are possible.	4-6	
	NEW	Fine Cut	For precisely cut and splinter-free surfaces.	4-6	
		Solid Materials	For the toughest demands such as plastic solid material and fibre-reinforced plastics.	1–3	
PLASTICS	NEW	Profile	For plastic profiles, acrylic glass (e.g. Plexiglas®) and soft plastics.	1–3	off
	NEW	Laminate	For laminate and boards bonded with melamine resin (e.g. Trespa®).	1–3	
METAL	NEW	Steel/Stainless Steel	For machining aluminium, non-ferrous metals and steel.	1–3	off
HEIAL		Sandwich Materials	For sandwich materials.	1–3	
		Abrasive Materials	For gypsum and cement-bonded chipboard and fibreboard.	1–3	
BUILDING MATERIALS		Ceramics	For machining brickwork and ceramics.	1–3	Min. for high precision Max. for high speed
		Insulation	For soft insulating materials, cardboard and polystyrene.	1–3

Quality cuts better.

Durability and precision under the toughest conditions. Adapted to the application and material. Made from high-quality steel with saw teeth made from fine-grain carbide. After all, you can only achieve a perfect cut when the saw blade is as good as the machine.

Colour code

Wood/Soft plastics

For hardwood, softwood, solid wood and building panels.

Plastics/Mineral materials

Fine-grain carbide guarantees perfect cuts in coated panels and mineral materials.

Aluminium

For aluminium profiles and panels.

Steel/Sandwich panels

The slightly chamfered teeth are suitable for sawing cable ducts or steel sheets and profiles.

Building materials

The material and teeth are designed specifically for working with abrasive materials.

Perfect adaptation

The saw blades are made of high-quality metal for perfect cuts and a long service life. Cutting angle and tooth shapes are adapted to the application and machine.

Long-term precision

A long service life and perfect cutting results come guaranteed thanks to the slow sanding action using diamond discs. Achieve flawless results without the need for major rework.

Simple selection

The practical colour coding system helps you quickly locate the correct saw blade for the specific application.

Minimum heat generation

Slow heating of the circular saw blades through laser-cut and thermally adjusted blade cores.

Robust quality

Long useful life and excellent sharpening properties of saw teeth guarantee an excellent price/performance ratio.

Rapid cutting progress

 $\label{thm:linear} \mbox{High-quality steel and optimised expansion slot for smooth, safe cutting progress.}$

Tooth shapes

Alternate top bevel saw blade (W/PW)

The teeth on this blade slope to the left and right and cut alternately. The alternate top bevel saw blade is a universal blade for all types of wood.

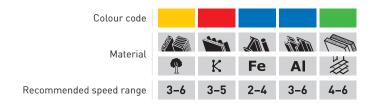

Flat trapezoidal tooth saw blade (TF)

With alternating trapezoidal and flat teeth, this blade is used for cutting aluminium, hard plastic and materials with hard coatings.

Flat tooth saw blade (F)

The edges of the teeth are straight, not slanted. Each tooth cuts in the same way. This tooth shape is used in saws for cutting steel and construction materials.

ROTEX RO 90 DX

Round tool that also sands in corners.

- Four tools in one: for coarse sanding, fine sanding, delta sanding and polishing.
 Resulting in low investment costs and savings on working time
- > Durable eccentric bearings, a double-sealed gear unit and a dustproof switch extend the service life of the machine
- ROTEX rotary motion for convenient polishing the reduced speed keeps the temperature low and prevents the polish from clouding or spraying off
- > FastFix sanding pad system, tool-less

Eccentric sander

ETS 125 R

Better handling, less strenuous work.

The ergonomic design of the compact sander is ideal for one-handed operation – for right and left-handers. The machine is perfectly balanced so that sanding pads run smoothly, allowing you to work effortlessly for longer.

The compact one-handed sander.

- > Work effortlessly: Thanks to the compact design, weight of just 1.2 kg and a perfectly balanced weight distribution
- > Up to 25% greater material removal capacity: The MMC control electronics transfer the power of 250 watts directly to the work surface
- > A healthy working environment and less rework: In combination with the mobile dust extractor or the long-life dust collection bag and attachable PROTECTOR for smooth sanding along window surfaces, frames and panelling
- > For continuous use: Long-life dust collection bag which can be emptied and reused, made from extra-durable nonwoven polyester

Cordless eccentric sander

ETSC 125

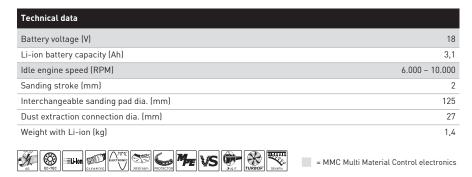

Brushless EC-TEC motor for a long service life and a high level of efficiency

The ergonomic cordless one-handed sander.

- > Mobile and effortless: Without cable and hose, with perfect ergonomics, low height and a weight of just 1.4 kg
- > Powerful: The 18 V battery pack in combination with the brushless EC-TEC motor ensures power similar to that of a mains-powered tool
- No interruptions: Thanks to battery packs with a capacity of 3.1 Ah which run for longer than their charge time
- Unlimited running time: For continuous electrical operation, the battery pack can be replaced with the plug-in mains adapter (included in the set and available as an accessory)

Maximum mobility.

Work effortlessly overhead, vertically or in hard-to-reach areas – without power cable and hose, with perfect ergonomics and a weight of just 1.4 kg (including battery), perfectly balanced weight distribution and low height.

What is the best way to obtain a perfect surface? With a system.

Rapid material removal and fine sanding pattern as a basis for the perfect finish or preparing high gloss surface. In no other area is the system concept as evident as the development of our sanding tools. Robust, ergonomic tools that were designed to be used effortlessly for long periods. With individually adapted pads and abrasive sheets for transferring force perfectly and abrasives developed with the same care as the machines themselves.

A system concept that focusses on perfect tools and perfect results as well as the people we design our tools for.

The sanding pad system.

Sanding pads suitable for every type of application are available in different degrees of hardness ranging from extra-soft to hard. Easy to change with Jetstream principle that reduces surface heat and ensures efficient dust extraction.

Abrasive system.

Adapted perfectly to every tool, pad and dust extractor. Individually designed for every application, from coarse to fine sanding. Festool abrasives have an extended useful life and are fast and easy to change due to the StickFix adhesive cushion strips.

The extraction and workspace system.

A well-planned workplace saves time and journeys. A good dust extraction system keeps the air free of dust and ensures consistent quality results while preventing the lungs from inhaling sanding dust.

Orbital sander

RUTSCHER RS 100

Professional with integral extractor.

- > Vibration Stop for smooth running and healthy working
- > Efficient dust extraction provides a clear view and ensures a healthy working environment
- > Well-balanced centre of gravity for perfect results and non-tiring work
- > Powerful stirring action and reduction gearing for maximum economic efficiency

High material removal rate.

Festool gear-drive sanders with reduction gearing are always designed for heavy-duty material removal and are therefore suitable for sanding old, thick and stubborn coatings over large surfaces.

Brushless EC-TEC motor for a long service life and a high level of

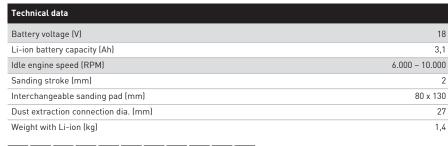

The ergonomic one-handed cordless orbital sander.

- > Mobile and effortless: Without cable and hose, with perfect ergonomics, low height and a weight of just 1.4 kg
- > Powerful: The 18 V battery pack in combination with the brushless EC-TEC motor ensures power similar to that of a mains-powered tool
- > No interruptions: Thanks to battery packs with a capacity of 3.1 Ah which run for longer than their charge time
- > Unlimited running time: For continuous electrical operation, the battery pack can be replaced with the plug-in mains adapter (included in the set and available

= MMC Multi Material Control electronics

Unique: With battery or cable.

For all applications which require an even longer operating performance, the 18 V battery pack can be replaced with the plug it-mains adapter (included in the set and available as an accessory). This creates a mains-powered machine with an unlimited running time for continuous electrical operation in combination with the plug it-cable - ideal in conjunction with a Festool mobile dust extractor.

System accessories from page 402

Designed for continuous operation.

Extremely robust, durable and reliable. Ideal for heavy-duty applications, paint shops or the industrial sector because compressed air sanders are lowmaintenance and significantly lighter than electric power tools. The extremely robust design guarantees a long service life. The innovative IAS 3 system ensures perfect extraction, low vibration values and a noticeably reduced noise level for a healthy working environment.

Three times the benefits - the Festool IAS 3 system.

The unique IAS 3 system combines three functions in one hose: compressed air supply, exhaust air extraction and dust extraction. Sanding dust and exhaust air are kept away from the working area, the surface remains clean and the resulting surface finish is excellent. The compressed air tool operates more quietly due to sound absorption elements in the hose. An intelligently designed exhaust air system prevents the discharge of cold air onto the hands and wrists and makes your work more enjoyable and healthier.

> Compressed air supply Exhaust air extraction Dust extraction

Compressed air eccentric sander

LEX 3 77

For surface finishing.

- > Extremely sturdy design ensures a long service life, minimal servicing requirements and high cost savings
- > Pleasant operating noise, low vibration levels and safe dispersion of exhaust air through a compressed air hose protects the health of the user
- Sanding pad brake reduces sanding errors when setting down the machine, thereby avoiding rework and additional costs
- > Low compressed air consumption ensures high cost savings

For extreme durability.

For smooth processes free of machine failures and maintenance.

Polishing system overview

Leave behind a brilliant impression. Festool polishes and polishing sponges.

Polish with ease and achieve brilliant results – Festool polishes are specially designed for their various applications. These polishes are water-based and do not contain silicone. When used in combination with the appropriate sponge they ensure reliable and optimal results for all types of coatings while requiring minimal effort.

The clearly organised colour coding system enables users to quickly find the appropriate product.

Polish

MPA 5010

Speed Cut 1-step sanding polish

High sanding performance and a high gloss finish in a single step

MPA 9010

Speed Gloss fine sanding polish

Fine sanding performance for intermediate and fine polishing

MPA 11010

anti-swirl-mark high-gloss polish

Extra fine sanding performance for removing microscratches and swirl marks

100 mm

Foam polishing pads

Coarse

for polishing heavily weathered surfaces (preparation for painting)

Mid

For polishing and removing imperfections in paintwork. Ideal together with the MPA 5010.

medium-fine

For producing a perfect high-gloss finish. Ideal for use together with MPA 9010.

Fine

For polishing out swirl marks and producing a deep shine. Ideal together with the MPA 11010.

Very fine

For removing polish residues on the painted surface.

Polishing felt and sheepskin pad

Hard polishing felt

Particularly suitable for UV clear coats, scratch-resistant clear coats

Soft polishing felt

For follow-up polishing of mineral materials, acrylic glass and clear coats

Premium sheepskin

For preliminary polishing of mineral materials, acrylic glass and clear coats

Finish cleaner and spray sealant

The high-quality microfibre cloths have a scratch-free edge to ensure a perfect finish for paint. They are perfectly suited to removing polish residue and grease spots when used in conjunction with finish cleaner.

The spray sealant is suitable for quickly and easily sealing painted surfaces, conserving, protecting and maintaining the paint.

^{**} Dependent on which mobile dust extractor (dust class) is used in combination.

We recommend putting your faith in dust extraction. We strongly recommend to:

Put your faith in the right extractor for the best dust extraction.

When working in a dusty environment or handling materials that generate large quantities of dust, your main priority should be protecting your health. How harmful the dust is to your health depends on the size of the particles as well as the quantity and time that the materials remain inside your lungs.

The smaller the dust particles are, the deeper they can penetrate into the lung tissue and this is why finer particles are much more harmful to the airways, with many being categorised as extremely hazardous to health.

In the interests of your own health, it is imperative that you keep the air clean when handling mineral dust that invariably contains quartziferous substances and always work with a certified and approved dust extractor or safety extractor.

Your Industrial Employers' Liability Insurance Association will provide you with detailed information and specially prepared lists of substances that exceed specified OEL (occupational exposure limits).

CTL MINI/MIDI CTL 26/36/48/48 EC

Full utilisation of the container volume

The sophisticated container geometry, compatible SELFCLEAN filter bag and space-saving flat filter combine to produce a net volume that corresponds almost exactly to the gross volume of the container.

New and now even better: SYS DOCK

Simple transportation, better organisation and endless flexibility. The SYS-Dock with T-LOC for the safe connection of SYSTAINER, SORTAINER and SYS-ToolBox units.

Cable holder

The cable can be wound up quickly and neatly thanks to the new cord holder. And – thanks to the sophisticated folding mechanism – it can be easily removed from the holder without complex unwinding. Now also available with the CT MINI and MIDI compact extractors.

Hose garage

The integral hose holder eliminates the need for external hooks and protects the suction hose and mains cable from damage. The suction hose winds around the holder for clean, compact transportation.

Smooth suction hose with CLEANTEC sleeve

The new suction hose: Smooth and flexible – with a smooth exterior for perfect sliding over surfaces, a longer service life and greater suction power. The new CLEANTEC extraction sleeve ensures a secure fit on the tool.

AUTOCLEAN automatic main filter cleaning system

Less cleaning work and constant suction power. The AUTOCLEAN automatic cleaning system eliminates the need to clean the main filter manually. Individual cleaning intervals can be defined to guarantee powerful, constant suction.

Simply the best for dust-free work.

The best mobile tool for your health - the new CT MINI and MIDI compact extractors with new highlights: innovative touch operating concept, internal hose holder for the smooth suction hose, level storage area and manual dedusting with fast access to the main filter from the outside.

The new suction hose – smooth, flexible and extremely robust.

Smooth exterior

For gliding perfectly over any surface or edge – the extremely robust, smooth exterior protects the flexible suction hose inside. Ideal for working with the Festool guide rail.

Conical geometry for improved suction

For reduced friction and increased airflow, resulting in better suction and faster progress with your work.

CLEANTEC dust-extraction sleeve

With bayonet fastener for securely connecting the tool to the suction hose.

CLEANTEC CT 17

Specialists for cleaning work.

- > Maximum utilisation of filter bag capacity due to new, innovative design principle
- > High suction performance and volume flow due to single-level powerful turbine
- > Blow function with end cap on the rear of the housing
- > Electronic level control for liquid suction

Matter of cleanliness.

Ideal for cleaning offices, garages, vehicles and construction sites. Also suitable for extracting

SYSTAINER extractor

CTL SYS

The extractor in SYSTAINER format.

- > Very small, lightweight and compact, in a SYSTAINER format for maximum mobility
- > With a new suction hose: Smooth and flexible with a smooth exterior which allows it to slide over surfaces perfectly
- > The integrated hose, cable and nozzle store mean everything is always available

Mobile dust extractors

CLEANTEC CTL MINI / MIDI

Thanks to the low weight and compact, ergonomic design, the CTL MINI/MIDI is perfect for transportation. Whether you need it for assembly work, installation work or renovation work - thanks to the 10 l/15 l container volume, the wet/dry extractor for cleaning work is perfect for extracting small to medium volumes of dust and dirt. For class L dust.

Compact. Mobile. Sophisticated.

- > Ideal for use on the go thanks to compact dimensions, low weight and robust chassis
- > Touch operation for intuitive control of the mobile dust extractor
- > Keep working until the filter bag is full thanks to manual dedusting
- > Internal hose holder for safe and clean transport of the smooth suction hose

CLEANTEC CT 26 / CT 36

All-rounder in the perfect size.

Compact yet effective. Lightweight yet powerful. Whether on the construction site or in the bodyshop – the perfected container geometry of the CLEANTEC CT 26/36 offers a significantly larger capacity with minimal external dimensions.

The true size can be found inside.

- > Maximum utilisation of the container volume the gross volume is the same as the net volume
- > Can be individually retrofitted with an additional socket and compressed air module

CLEANTEC CT 26 AC / 36 AC / 48 AC

No more clogged filters.

Prevent clogged filters with the CLEANTEC AC. An automated filter cleaning system keeps the filter clean and maintains a constant suction power. One-touch cleaning can be initiated at any time.

Fully automatic filter cleaning.

- > AUTOCLEAN automatic main filter cleaning system with infinitely adjustable cleaning intervals for consistently high suction power
- > Can be individually retrofitted with an additional socket and compressed air module
- > Maximum utilisation of the container volume the gross volume is the same as the net volume
- > Smooth suction hose and optimised SYS-Dock with cord holder and T-LOC function for conveniently connecting SYSTAINERs to the mobile dust extractor

Our contribution to a shorter work time.

The quicker a sander removes material, the more powerful the connected mobile dust extractor needs to be. The powerful CT 36 AC PLANEX was designed specifically for the extreme material removal rate of the PLANEX long-reach sander. Includes a tool holder, kink-proof hose and series standard ComfortClean closing slide for even more efficient filter cleaning. Perfect results every time at maximum speed.

The specialist for the toughest demands.

Asbestos, mould, mineral fibre dust, lead, cadmium, nickel, zinc chromate. Many risks – one defence: the CTH special application extractor from Festool. Carcinogenic and pathogenic dust stand no chance. With a 99.995% degree of filtration even mould removal and asbestos abatement or woodworking with dangerous impregnating compounds pose no health problems.

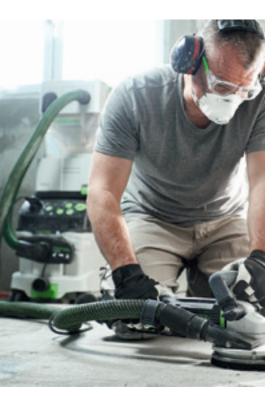

Pre-separator

CT-VA

Copes with high volumes of dust. Efficient, simple and reliable.

- > Copes with high volumes of generated dust thanks to cyclone technology
- > Consistently high suction power as a result of reducing the load on the main filter
- > Easy and safe to transport thanks to a stackable collection container with compact dimensions and a sturdy design
- > Work flexibly in every application with and without CT pre-separator

Work efficiently with constant suction power.

From now on, large quantities of dust and chips are not a problem any more. Neither for the main filter nor for the suction power. This is because the pre-separator, which is compatible with Festool CT mobile dust extractors, collects up to 95% of the dust before it reaches the mobile dust extractor. This takes the strain off the main filter and guarantees consistently high suction power throughout the entire work process.

High volumes of dust, shavings and chips are no longer a problem for neither the main filter, nor for the suction power. The pre-separator (compatible with Festool CT mobile dust extractors) collects up to 95% of dust before it reaches the mobile dust extractor. This reduces the load on the main filter and ensures consistently high suction power throughout the work process.

Cyclone technology

The Festool CT pre-separator with cyclone technology separates and collects coarse and fine dust before it reaches the mobile dust extractor. The dust-heavy air that is drawn in is swirled into a spiral movement in the cyclone, causing the dust particles to hit against the wall of the cyclone and, due to the gravitational force, to fall into the collection container of the CT pre-separator.

Fine mineral dust

Benefits of working with the CT pre-separator

- > Constant, high suction power
- > Quick and easy disposal
- > Removal of load from main filter
- > Work without interruptions
- > Up to approx. 80% of dust extracted

The Festool system. **Everything in view.**

Because things work better when everything fits together: Which is why all Festool mobile dust extractors are equipped with an integrated hose garage and SYS-Dock for holding the SYSTAINER. Many models are also fitted with modular plug-in slots. A handle or removable tool holder can be added as an option. Furthermore, they are not only compatible with all Festool power and compressed air tools, but the various accessories are also interchangeable.

CXS

Easy access to every screw.

The XS cordless drills are perfect for when it gets really tight. The elbow adapter is just right for corners and narrow spaces, and the integrated LED light is perfectly suited for dark areas.

When it comes to performance, size really isn't that important.

- > Impressive ergonomics and low weight (0.9 kg) for convenient drilling and fastening
- > The compact, handy shape makes work easier, even in cramped spaces
- > FastFix interface and CENTROTEC quick tool-change system
- > Practical integrated LED light and battery charge indicator

Cordless drill TXS

When it comes to performance, size really isn't that important.

- > High-quality lithium-ion battery technology for the longest sustained usage
- > FastFix interface and CENTROTEC quick tool-change system
- > 12 torque settings and torque switch-off for precision fastening
- > Impressive ergonomics and low weight (0.9 kg) for convenient drilling and fastening

C 18

The C 18 has won many awards for outstanding design with a proven brushless drive concept. The combination of lithium-ion battery packs and EC-TEC motor makes the C 18 even lighter and gives it even more power and battery life making the C-series the most powerful ever.

The perfect shape.

- > Brushless EC-TEC motor with integrated motor management for long service life and the highest output
- > Fully electronic torque setting and switch-off for precise screwdriving
- > FastFix interface for all FastFix attachments and CENTROTEC rapid tool-change
- > Switchover from screwdriving to drilling without changing the set torque

Cordless hammer drill

BHC 18

Handy and compact - no compromises!

The BHC 18 slices through concrete with ease. It features an ergonomic design for maximum comfort while working, a pneumatic hammer mechanism to provide enormous impact energy and integrated vibration damping that absorbs the impact energy before it reaches your hands. The BHC 18 sets new standards thanks to its efficiency and ease of use and the best powerweight ratio in the 18 V class.

The most powerful compact hammer drill

- > Unbeatable power to weight ratio thanks to the combination of EC-TEC motor and C shape model

QUADRILL DR 20

The high-torque drill.

- > Multiple reduction gears that achieve a high torque
- > Removable keyless chuck and bit holder in spindle, perfect for drilling and screwdriving
- > Extremely robust and durable with large attachment collar, heavy-duty drive spindle and large spindle bearing
- > Precision keyed chuck with FastFix and locking device

The large QUADRILL with excellent speed.

The key feature of the QUADRILL DR 20 is the FastFix interface with which the machine can be set to different functions in an instant.

Cordless drywall screwdrivers

DURADRIVE DWC 18

Large-scale screwdriving applications in drywall construction can be completed conveniently, quickly and efficiently with the DURADRIVE DWC 18. It boasts high speed, low weight at 1.9 kg and a compact design. Its innovative stop-and-go function only activates the brushless EC-TEC motor when it is needed – enabling up to 40% increased screwdriving performance per battery charge. With the depth stop, the DWC can also be used for single screws.

Power and durability for interior work.

- > Precision, wear-free electronic switch-off function for accurate insertion depths and a long service life
- > Energy-saving function for machine start/stop without actuating the main switch
- > Robust, brushless EC motor for maximum efficiency and durability

Decidedly different: Cordless drills by Festool.

More time working, less time charging.

The EC-TEC drive concept stands for the extraordinary application of power with minimal power consumption across the entire speed range – from the insertion of large screws to drilling at speeds of up to 3800 rpm. The EC-TEC motor is wear-free, has no carbon brushes and is therefore maintenance-free and extremely robust.

Simply faster.

Drilling, countersinking and screwdriving: The CENTROTEC quick-change system is a drill chuck and bit holder in one, 50% smaller and 80% lighter than a standard drill chuck. The direct and reliable power transmission by the rotary holder directly and centrally in the machine shaft prevents the drill bit from penetrating through, even in hard materials.

A tool that works without needing tools.

Mounted and quickly replaced without the need for tools: The cordless drills or the powerful QUADRILL mains-operated drill can be retrofitted in an instant to a maximum of five tools: Drill, screwdriver, elbow drill, elbow screwdriver or drywall screwdriver, using the FastFix attachments.

The Festool system. **Everything in view.**

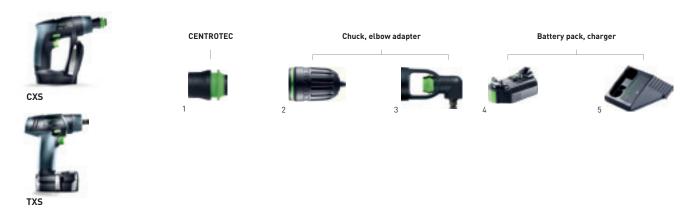

Because things work better when everything fits together: System accessories, matching quick-change attachments, a diverse range of screwdriver and drill bits with the CENTROTEC tool system as well as ingenious battery packs with a charge indicator have made Festool cordless drill and rotary impact driver series even better, more flexible and reliable.

OF 1010

Small tool for delicate tasks.

- > Outstanding ergonomics and low weight
- > Handle for easy one-handed operation
- Spindle stop for easy cutter changes
- Quick-acting brake for improved safety (OF 1010 EBQ)

A host of features for perfect working results.

Whether guided independently or on the guide rail, the OF 1010 is the perfect one-handed router. Compact and lightweight, you can guide it accurately along edges, lines or curves, using only one hand.

Router OF 1400

Power and ease of operation in perfect harmony.

- > Pure precision: rigid base plate due to guide columns on both sides
- > Short set-up times: Rocker and ratchet principle for convenient cutter changes
- > Routing depth adjustment to 1/10 mm
- Quick-acting brake and MMC electronics

Technical data	
Power consumption (watt)	1.400
Idle engine speed (RPM)	10.000 – 22.500

Max. cutter diameter (mm)	63
Dust extraction connection dia. (mm)	27/36
Weight (kg)	4,5

An impressive all-in-one package.

At 4.5 kg, the OF 1400 is the lightest in its class and has an impressive 70 mm routing depth adjustment range. This is particularly useful when making recesses for fittings or routing with templates.

Router

OF 2200

The power pack with enormous torque.

- > Top power development and fully variable speed for hard materials and increased material thicknesses
- > Outstanding ergonomics: guide rods offset by 30 degrees to transfer force efficiently
- > Dual guide column clamp for extra torsional rigidity and greater precision
- > Maximum safety: safety brake stops the cutter promptly

Unrivalled performance and operation.

More powerful, easier to use, increased comfort and safer - the OF 2200 offers the greatest low-end torque, the highest precision and the greatest ergonomic comfort. No matter what your task is - with the OF 2200, you have the solution in your hands.

Adapted to the task in hand.

Festool offers a compatible range of routers and laminate trimmers for every task. A range that not only includes tools, but also a wide selection of ingenious system accessories. Interchangeable copying rings and base runners, for example, allow you to adapt your machine to changing task requirements. Multifunctional routing templates can be adjusted to any dimension both quickly and accurately, while routers OF 1010, 1400 and 2200 can be converted into benchmounted routers. All of these solutions were developed following close collaboration with the handicraft trade – bringing you closer to the perfect result with greater speed and efficiency.

03

01 Quick response to changing requirements.

Base runners and copying rings for the OF 1400/OF 2200 can be replaced quickly using FastFix without requiring tools. Changing router bits is also a simple matter, thanks to the ratcheting mechanism, which allows you to either tighten or release the router bit without having to turn the open ended spanner.

02 Cleaner, healthier work.

The new suction design behind the OF 2200 ensures suction power of up to 99%. The retractable extractor ring seals off the chip space when the router is used in plunge mode. However, the ring can be locked in place on top for a perfect view of the scribe mark. The chip deflector can be rotated 360° and ensures maximum suction power.

03 Impeccable guidance.

The guide rail was invented and perfected by Festool. For enhanced precision of grooves and rows of holes. Fitted with slideway lining to allow machines to glide smoothly along the rail, plus a groove for fastening and lever clamps.

Module mounting

CMS-OF

Router for the CMS system.

- > Module mounting for installing routers
- > The router can be used not only as a bench-mounted tool, but also as a handheld tool
- > Simple routing height adjustment with a crank handle
- > Flexible extension options for an even wider range of applications

From mobile to stationary in a matter of

With the CMS module, standard routers can be transformed into bench-mounted routers suitable for a wide range of applications. The transparent routing guard guarantees efficient dust extraction while also providing a good view of the workpiece.

Routing template

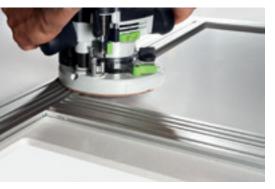

MFS

The template with all the options.

- > Scale on the profiles accurate to the millimetre for absolute precision when making cut-outs and curves
- > Aligned exactly with the workpiece via the angle stops
- > Secured quickly workpiece secured in prefabricated groove for fastening and lever
- > Option of systematic extension with table extensions from 200 mm to 2000 mm

A multi-talent.

The laborious manufacture of templates or temporary solutions has become a thing of the past: the MFS multi-routing template is versatile and perfect for curves, round or square cut-outs and routing staircase stringers.

Precision as standard.

- > Robust routing template made from aluminium
- > For corner and panel joints with fixed fence with panel depths of 600 and 650 mm or, if moved, up to 900 mm
- > Additionally with two routing templates that can be freely positioned for making recesses for conventional fittings on the underside of panels

Clean corner and panel joints are easy to manufacture with the worktop template. The permanently fixed template guarantees precision results, even when the router passes several times along a single groove.

Jointing system

VS 600 GE

Combining tradition with efficiency.

- > Perfection in a system: router, template and copying ring are fully compatible with one another
- > Wide application spectrum: from dovetail joints and box joints to dowelling joints
- > Templates changed quickly and easily without using tools
- > Robust aluminium design and steel contact jaws ensure an extended service life

Technical data	
Workpiece thickness (depending on join) (mm)	6 - 29
Max. workpiece width (mm)	600

Eternal precision.

The jointing system VS 600 is an exceptionally logical method of achieving perfect woodworking results. Offering outstanding precision for partially covered and open dovetail joints, box joints and custom-fit dowelling joints.

Precise hole rows with the guide rail.

Series of holes must agree in terms of distance and parallelism. To save time when carrying out this type of work, there is the hole row guide rail. It has a series of holes set 32 mm apart, along which the router is guided with the hole row adapter. Thanks to the clever tipping method, the detent pin can be quickly indexed for the next hole. The series of holes are therefore very easy to copy.

Edge trimming system

OF-FH 2200

Safe, precise routing of seal slots

- > For secure guidance of the Festool router along narrow workpiece edges
- > Side stops can be adjusted 60 mm on both sides with long guidance areas
- > High-quality cutter device made from sturdy and solid acrylic glass
- > Used, for example, for the reliable milling of automatic door seals

Routing door seals.

The grooving of doors is often still considered as a task for bench-mounted routers. With the Festool routing aid and the router, the work can be carried out on site achieving results which are not inferior to those of bench-mounted routers. And thanks to the integral dust extraction, the environment also remains free of wood dust.

Laminate trimmer **OFK 500**

Compact edging professional.

- > Routing depth adjustment to 1/10 mm
- > Perfect adaptation of cutter to borehole in bench to prevent routing errors
- > Stable connection between cutter and drive mechanism for maximum true- running precision
- > Spindle stop for quick and easy cutter changes

Power consumption (watt)	450
Idle engine speed (RPM)	28.000
Max. cutter diameter (mm)	28
Dust extraction connection dia. (mm)	27
Weight (kg)	1,4

For trimming round objects.

The OFK 500 is particularly lightweight and perfectly balanced, making it manoeuvrable and ideal for both vertical and horizontal use. The small distance between the cutter and router base prevents the machine from tipping over edges, guaranteeing perfect results.

Laminate trimmer

OFK 700

Edging multi-talent.

- > Detachable router table with large support surface
- > Base inclined by 1.5° for excellent working results
- > Routing depth adjustment to 1/10 mm
- Contact spring for smooth routing pattern

Impressive both on curves and in straight lines.

The OFK 700 EQ is a multi-talent among edge trimmers because it makes easy work of trimming edges and surface projections, irrespective of whether the workpiece is large or small, or whether the edges are curved or straight. The quick, heavy-duty detachable router table provides a stable surface area and secure guidance for the machine in any working position.

Aluminium composite milling machine

PF 1200

The professional solution for aluminium composite panels.

- > Removable feeder roller for different material thicknesses
- > Low weight for easy transportation and mobile applications
- > Guide slot for guide rail
- > Blade cutter for rapid progress and effortless precision routing

Technical data	
Power consumption (watt)	1.200
Idle engine speed (RPM)	1.900 – 5.200

Weight (kg)	5,4

Grooving. Edging. Finished.

Specially developed for edging aluminium composite panels with speed and precision. In combination with the guide rail, the PF 1200 aluminium composite milling machine is ideal for mobile exhibition and façade construction applications. The feeler roller ensures precise routing depths. The router can only plunge into the material as far as the feeler roller allows.

The Festool system. **Everything in view.**

Because things work better when everything fits together: The comprehensive range of system accessories for routers and laminate trimmers leaves nothing to be desired and helps accelerate working processes. From the hole series guide rail, which can also be used with plunge-cut saws and jigsaws, to perfectly adapted cutters and a large selection of copying rings and base runners for a range of applications.

Expertise in routing -Festool cutters.

Unconditional quality is uncompromising. That is why we recommend original Festool routing accessories for all Festool routers. Produced with the same care as the tools. With cutting blades that boast micro-grain quality and micro-grain density, and with a cutting geometry that guaranties first-class results and an excellent service life. Machines, routers and accessories - we provide optimum equipment from a single source for versatile and efficient working.

The right material for every application

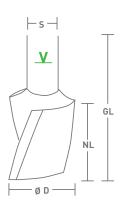

HW Tungsten carbide

HW routers are ideally suited to processing hardwood, panel materials and plastic.

HS High performance, high speed steel

This steel has mechanical and thermal properties that are best suited for routing soft materials such as spruce and pine.

GL Total length (mm)

NL Working length (mm)

D Cutter diameter (mm)

s Shank diameter (mm)

alpha Chamfering angle (°)

R Radius (mm)

✓ Marking for minimum clamping length⚠ n max. = maximum router speed

HW Tungsten carbide

HS High performance, high speed steel

Tip

For the best routing patterns, the cutters should always mounted at the lowest depth possible, and at least as far as the marking for minimum clamping length on the router shank.

Long service life, even when plunge cutting.

Order no.

If you wish to achieve quality cutting results with ease when drilling, grooving, rebating and long-hole routing, you are best advised to use the HW groove cutter. It cuts precisely, makes drilling easier and has a long service life.

Hard-wearing drill point.

After drilling 60 holes in a kitchen worktop (30 mm deep): Cutting edge only shows slight signs of wear.

Ground drill point.

After drilling 60 holes in a kitchen worktop (30 mm deep): Blunt cutting edge.

Precision – even after sharpening.

When sharpening blunt edges on conventional cutters, the diameter aligned to the ball bearing guide normally decreases. This causes a ridge to form when edges are trimmed flush after the bit is sharpened. The turning plate slot cutter and ball bearing guide maintain a high level of precision.

Every wooden joint has its advantages.

The DOMINO jointing system combines them all.

The DOMINO long-hole principle.

Custom-fit alignment: The first DOMINO is positioned in a precision cut elongated hole, the next DOMINOs are inserted into wider holes with play so that the joint can be aligned effortlessly. The result is a stable joint, rotation-proof from the first DOMINO.

Two machines. DOMINO sizes ranging from 4 to 14 mm in diameter, flexible adjustment options and compatible system accessories offer virtually unlimited joining possibilities. Even narrow strip material and round poles can easily be joined.

Impressive time savings.

No complicated adjustments or measurements: with integral stop pins for positioning the machine quickly and accurately. It is easy to adapt the routing height and depth to different material thicknesses. When making solid joins, you can save up to half the time with the DOMINO XL.

Beechwood DOMINO

Bear the Pan European Forest Council (PEFC) quality seal for wood products originating from sustainable, well-maintained, responsible forest cultivation.

Are weatherproof and resistant to insects and mould, making them ideal for outdoor applications. They are manufactured from wood from sustainably managed and monitored forests.

Stability joins flexibility.

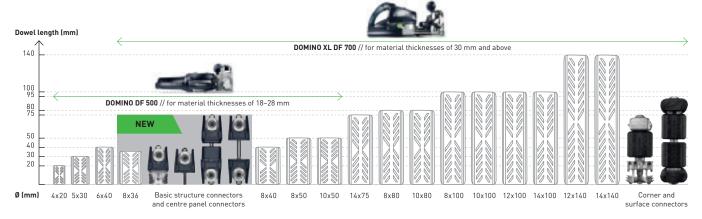

The connectors can be accurately and precisely positioned in next to no time, without any need for templates or other special machines. Complex measuring and marking are no longer required. This saves a lot of time, prevents unnecessary reworking and makes work easier.

The combination of dowel and fixed clamp guarantees an extremely strong joint. In addition, the large pulling and tightening distance ensures it is very stable, even during set-up. You can rely on the flexible DOMINO connectors in every situation.

Flexible

Create robust joints quickly and simply with the DOMINO connectors – and loosen them again when required. Perfect for corner and surface joints, and now for center panel joints and joints between series of holes. The cover caps in various colours provide the perfect finishing touch.

Perfect connections made easy. The DOMINO family at a glance.

The 8–14 mm diameters are also available as rods and in two types of timber for interior and exterior applications. From sustainable forestry.

NEW

The basic structure connectors and furniture connectors for the DOMINO DF 500 joining machine.

Corner joints, center panel joints and joints between series of holes for material thicknesses of 18 mm to 28 mm. Everything is possible with the new connectors. They can be universally positioned with DOMINO dowel or in a series of holes and guarantee scratch-free transportation of items of furniture thanks to the flush-screwed fixture elements. These connectors significantly facilitate work when producing, assembling and disassembling furniture.

Centre panel connector – for DOMINO/LR 32 joint

The corner and surface connectors for the DOMINO XL DF 700 joining machine.

For frame, rack and panel joints for material thicknesses of 30 mm and above – these impress not only with their extremely high precision and stability, but also thanks to their optimum flexibility and unparalleled efficiency. Create perfect wooden joints in next to no time with these connectors and the DOMINO XL DF 700 – and loosen them again just as quickly.

DOMINO corner and surface connectors for DF 700

	Denomination	Explanation	Order no.
1	Anchor bolt SV-AB D14/32	for processing using the DOMINO XL DF 700 joining machine, corner connectors for frame and rack joints at material thicknesses of 30 mm or higher, in conjunction with SV-SA D14 split anchors and SV-QA D14 cross anchors for creating corner connections, 64 x dowel half-shells, qty. in pack 32 Units, in carton	201350
2	Split anchor SV-SA D14/32	for processing using the DOMINO XL DF 700 joining machine, corner connectors for frame and rack joints at material thicknesses of 30 mm or higher, in conjunction with SV-AB D14 anchor bolts and SV-QA D14 cross anchors for creating detachable corner connections, qty. in pack 32 Units, in carton	201349
3	Cross anchor SV-QA D14/32	for processing using the DOMINO XL DF 700 joining machine, at a material thickness of 30 mm or higher, acts as a counter bearing and tightening element for anchor bolts or double-headed bolts, with soft or porous material such as chipboard, the use of the cross anchor expander SV-V D14 is recommended (for material thickness 35 mm and greater – stops the cross anchor being pulled into the material), in conjunction with SV-SA D14 split anchors and SV-AB D14 anchor bolts for creating corner connections, in conjunction with SV-DB D14 double-headed bolts for creating flat connections, 32 x set screws, qty. in pack 32 Units, in carton	201351
Extension table for SV-QA D14 cross anchors, for processing cross anchors for improved pressure distribution for applications in porous or soft materials such at kitchen worktops, prevents the cross anchor being drawn into the material, 64 half-shells for widening 32 cross anchors, qty. in pack 32 Units, in carton		201498	
5	Double-headed bolt SV-DB D14/16		
6	Cover cap SV-AK D14 str/32	for processing using the DOMINO XL DF 700 joining machine, plastic cover caps for closing D14 dowel cross-cuts, colour: Lacquered silver, qty. in pack 32 Units, in self-service display pack	201354
	Cover cap SV-AK D14 brn1/32	for processing using the DOMINO XL DF 700 joining machine, plastic cover caps for closing D14 dowel cross-cuts, colour: Dark brown, qty. in pack 32 Units, in self-service display pack	201355
	Cover cap SV-AK D14 brn2/32	for processing using the DOMINO XL DF 700 joining machine, plastic cover caps for closing D14 dowel cross-cuts, colour: Light brown, qty. in pack 32 Units, in self-service display pack	201356
7	Connector set EV/32-Set	corner connectors for frame and rack joints at material thicknesses of 30 mm or higher, complete set consisting of anchor bolts, split anchors and cross anchors for 32 corner connectors, 32 anchor bolts, SV-AB D14, 32 cross anchors, SV-QA D14, 32 split anchors, SV-SA D14, in carton	203420
	Connector set FV/16-Set	surface connectors, complete set for 16 surface connections consisting of double-headed bolts, cross anchors and wideners, 16 double-headed bolts, SV-DB D14, 32 cross anchors, SV-QA D14, SV-V D14 widener for 32 cross anchors, in carton	203421
8	DOMINO connector range SV-SYS D14	for processing using the DOMINO XL DF 700 joining machine, includes corner connectors and flat connectors incl. cover caps and DOMINO wooden dowels, required accessories: DOMINO cutter D 14 (497871), 32 anchor bolts, SV-AB D14, 16 double-headed bolts, SV-DB D14, 32 split anchors, SV-SA D14, 32 x DOMINO birch D 14 x 75, 2 x 32 cross anchors, SV-QA D14, SW 4 pin wrench for tightening the set screws, SV-V D14 widener for 32 cross anchors, 32 cover caps, silver, SV-AK D14 slr, 32 cover caps, dark brown, SV-AK D14 brn1, 32 cover caps, light brown, SV-AK D14 brn2, in SYSTAINER SYS 2 T-LOC	201353

The principle of the one-handed planer is exemplary.

Carpenters still regard the classic hand planer as the machine to use for demanding surfaces. With a drawing cut and perfect adjustment of the blade angle, we have adopted and transferred this principle to the unique spiral blade.

Noticeably more refined, considerably quieter.

The spiral blade is diagonal instead of horizontal and makes a drawing cut that reduces machine noise considerably and produces a much more refined planing pattern. No chatter marks. No reworking.

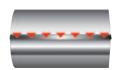

Simply faster.

The simple blade replacement system with automatic adjustment function eliminates the need to adjust the blade cutting circle diameter.

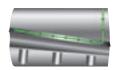

Operating principle: classic planer blade

The blade meets the wood head-on, resulting in a "chopping cut" that leaves behind chatter marks and splinters. The high forces exerted on the drive shaft also increase tool wear.

Operating principle: spiral blade

Initial contact is made over a small surface and force is then transferred smoothly across the entire width of the blade. The angled blade strips off the wood more gently and decreases tool wear.

EHL 65 EQ

Modified slightly. Improved decisively.

- > Only 2.4 kg, compact height, soft grip on handle and chip depth adjustment, additional grips for better support
- > Quiet: The spiral blade reduces the noise level considerably
- > Maximum 4 mm planing depth and 23 mm rebate depth for more speed and flexibility
- > Variable chip depth adjustment and spiral blade for high surface quality in diverse application areas

The Festool system

Overview of products and applications

Edging curves, radii, convex and concave shapes is easy with the CONTURO. Even mitred edges can be cut to an outstanding quality with the stationary unit. Quick, easy and clean ideal for shaped parts and small batches. Suitable for machining all types of wood, plastic or melamine edging with a height of 18-65 mm and edge strength of 0.5-3.0 mm (depending on material). The CONTURO is packed away safely in a SYSTAINER, extremely mobile and delivers a perfect edge quality, even in combination with system accessories.

^{*} heavily dependent on the material

The perfect edge. The CONTURO in a system.

At the heart of the system, the CONTURO is responsible for the gluing process while the surrounding system components perform all other working steps. From cutting and milling chipboard to size or applying glue, pressing down edging, cutting and flush trimming, smoothing and polishing – the Festool system operates with a level of professionalism and clean quality that only bench-mounted machines can achieve.

- > Easy, clean and efficient working progress and patented cartridge gluing system for quick colour changes
- > Precision glue application for a perfect join quality and maximum adhesion
- > Nozzle system that is easy to clean, machine housing does not heat up, allowing safe working progress
- > Adhesive melts according to requirements and does not boil, discolour or deteriorate

The basis for the perfect edge.

Versatile and easy to operate, the CONTURO represents a genuine solution for manufacturing individual moulded parts, as well as affixing edging to workpieces or furniture components produced in small batches. Packed in a SYSTAINER, the CONTURO is also suitable for mobile use as well as manufacturing edging in situ with a perfect quality finish.

Stationary unit for edge gluing.

Stationary edging? Yes, with the MFT/3 CONTURO – a special multifunction table for the CONTURO KA 65. Simply insert the edge bander in the multifunction table MFT/3 CONTURO via an adapter plate. As a result, not only straight edges and curves can be trimmed, but also sloping edges. The CONTURO KA 65 can be swivel-mounted in the stationary unit from 90° – 45°.

The Festool system. **Everything in view.**

As the basis for the perfect edge, the CONTURO assumes the gluing process. Its system completes all the other steps. From the glue application, pressing the edges, trimming to smoothing down and polishing – the Festool system makes everything possible in an equally professional and clean quality which was previously only possible with bench-mounted machines.

Maintains its position.

Stooped over mixing is now a thing of the past. The size of the MX stirrers can be adapted with the ErgoFix height adjustment. You work upright, protect your back and can completely rely on the powerful engines, which ensure intensive and quick mixing. The stirrers have anti-slip rubber corners for positioning against the wall between use. And after the work is completed, they are easy to clean and transport - the machine and stirrer can be disconnected without the need for any tools.

Ergonomic - mix while standing upright.

Simply adjust the stirrer to match your height with the patented ErgoFix height adjustment system. Mix in a natural upright position for relaxed and effortless working.

One for all.

The ErgoFix adapter has a classic M14 tool holder so that all current stirrer baskets can be used. In addition, it is designed for the entire service life of the stirrer thanks to its special coating.

Lightning quick changes without using tools.

The FastFix quick-change system allows the detachment of the stirrer basket from the machine and rapid basket changes without the need for tools, easy cleaning and space-saving transportation.

Stirrers MX 1000 / MX 1000/2 MX 1200

Robust, ergonomic, powerful.

- > ErgoFix height adjustment with integrated quick-change function

Diamond grinder

RENOFIX RG 130

The specialist for hard sub-surfaces.

- > Diamond grinder operates at the perfect speed for diamond tools
- > 1,600 W motor for rapid material removal and working progress
- > Folding segment allows you to work directly on walls
- > Reliable guidance and adjustable, defined material removal with guide table

The light to the tool.

- > Three powerful, energy-efficient, high-performance LEDs
- > Lamp head can be adjusted into nine different positions by a vertical angle of 135°
- > Stable and tilt-resistant, or can be flexibly attached using belt clip and trestle hook

Technical data	
Battery voltage (V)	10,8/18
Light source	3 SMD LEDs
Lumen value (lm)	43
Weight (without battery pack) (kg)	0,34

Small, but surprisingly powerful.

The handy SYSLITE UNI is always ready to light up dark corners. Its lightweight and compact design makes it a welcome working aid. It is compatible with all conventional Festool batteries.

SYSLITE KAL II

The light to the tool.

Technical data

- > Excellent light thanks to 12 high-performance LEDs
- > Long life and robust thanks to shatter-proof housing
- > Continuous use any Festool battery pack can be attached to supplement the internal battery. The 230 V mains power pack and vehicle charging cable offer additional charging and power supply options
- > Compact design can be flexibly positioned without cable hazards

Lumen value 1st/2nd stage (lm)	310/769
Operating time (internal battery) 1st/2nd stage (min)	290/120
Li-ion battery capacity (Ah)	2,9
Li-ion charging time (min)	200
Permissible operating temperature range (°C)	-5/+ 55
Operation with external Festool battery packs (V)	10,8 – 18
Hook opening (mm)	40
Thread size stand (")	1/4
Dimensions (L x W x H) (mm)	80 x 100 x 150
Weight (without battery pack) (kg)	0,7

Total flexibility.

Five available installation and mounting positions: The SYSLITE KAL II lights up the darkest of corners for up to six hours nonstop. The housing is made from shatterproof, shock-proof and impact-resistant cast aluminium - durable enough for any construction site. The large light dispersion angle of 170° ensures that the entire work surface is illuminated uniformly.

See everything. Work with more precision. With the right light for every situation.

The SYSLITE DUO working light, the SYSLITE KAL work light, the portable SYSLITE UNI or the SYSLITE STL 450 inspection light for surfaces – whichever you choose, all our lighting solutions are developed with the same aim in mind as our tools: Making your work easier, and improving your results, by providing excellent lighting for every situation – from small surfaces through to entire rooms. Because high-quality lighting is essential for good work.

SYSLITE UNI

Small and compact for ultimate mobility. Compatible with all Festool battery packs.

SYSLITE KAL II

Turns dark surfaces into work surfaces in an extremely versatile manner. Can be positioned or suspended in five positions and powered by a wide variety of sources (internal battery, battery pack, mains cable or car charger).

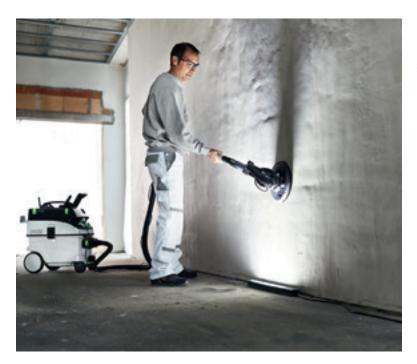

SYSLITE DUO

Extensive illumination (mainspowered) of entire rooms with light quality that replicates daylight. Can be used in a wide variety of ways: Stands alone on the floor or flat surfaces, attaches to the Festool tripod or, if preferred, hangs on hooks using the suspension means on the rear side of the

The inspection light optimally focuses the light – ideal for inspecting surfaces even when working. Variable height and inclination with compatible tripod and long cable for a large range of applications.

With the SYSLITE STL 450 inspection light you can inspect surfaces while working, benefitting from perfect results and satisfied customers from the outset.

Classic halogen lamp

Yellow luminous colour, diminishes in peripheral vision.

Because light quality is reflected in the quality of your work. Experience the difference:

Conventional LED light

Blue light colour, small light dispersion angle, lower luminosity.

Festool SYSLITE DUO

The Festool system

The CMS Compact Module System

CMS Compact Module System. Open to change.

Five machines in one. Stationary or handheld. Covers $0.5~\mathrm{m^2}$. Only possible with a system. The CMS Compact Module System consists of a basic unit and compatible modules that transform the unit into a stationary benchmounted saw, jigsaw, bench-mounted router or belt sander.

Safe and convenient.

The machines can be switched on and off from the basic unit.

Mobile and stable.

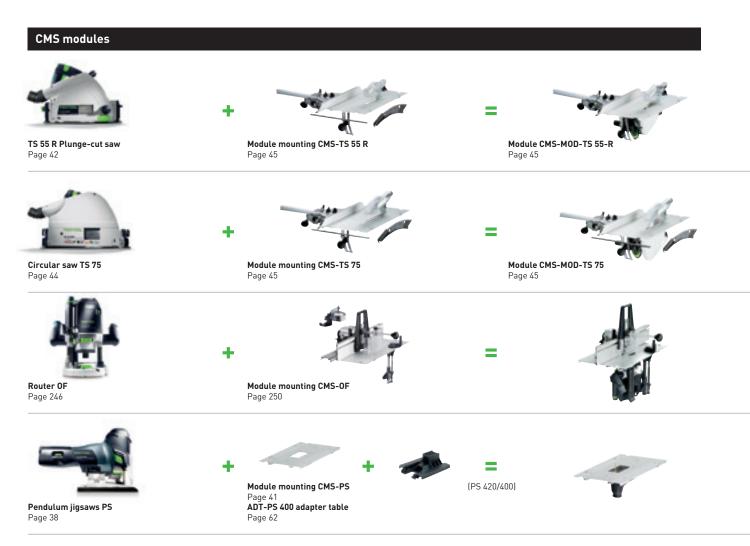

At only 10.8 kg, the basic unit is extremely lightweight yet robust.

Adjustable height.

Foldaway legs on the basic unit allow you to work on the floor or standing up.

Easy to extend.

A comprehensive selection of accessories, such as the sliding table, angle stop and extension table, allow the CMS to be adapted for a wide range of applications.

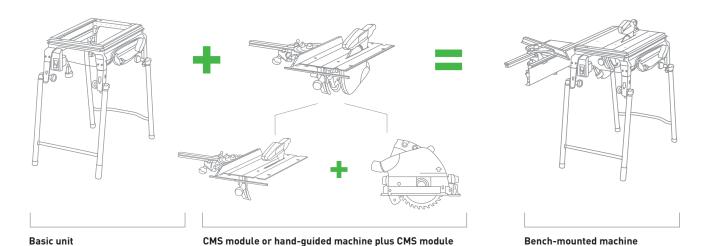

All modules in the established Basis-Plus System can be combined with the basic unit of the CMS, except for the Basis 1 A module.

Guide rail

FS/2

The guide rail is available in 8 different lengths, from 800 mm to 5000 mm.

Impeccable guidance.

- > Zero-play guidance you can adjust the guidance jaws on the circular saw to fit the guide rail without using tools
- > Splinter-free cuts the splinter guards positioned directly on the scribe line prevent the edges from splintering, even on angled cuts
- > Precision results the router guide stop was designed for precision grooves
- > Quick for diagonal cuts with guide rail and combination bevel, angles are easy to transfer from the workpiece or wall

Suitable for furniture construction.

Battery and charging technology from page 409 onwards

Power distributor **SYS-PowerHub**

The first system-integrated power cable in SYSTAINER format.

- Tidy: There is plenty of room inside for the securely connected 10 m long cable.
 The SYS-PowerHub also features room for any battery packs or small parts required
- > Can supply power to up to four power tools simultaneously. The internal power socket can also be used to charge a mobile phone, for example, while protecting it against contamination
- Can be connected to other Systainers even when closed, thanks to the two cable outlets
- > When connected to the mains, the red light on the front signals that it is ready for operation

Technical data	
Safety class	IP44
Cable length (m)	10
Power consumption (watt)	2.500
Number of sockets	5
Dimensions (L x W x H) (mm)	396 x 296 x 157,5
Inner dimensions (L x W x H) (mm)	383 x 154 x 128
Weight (kg)	4,2

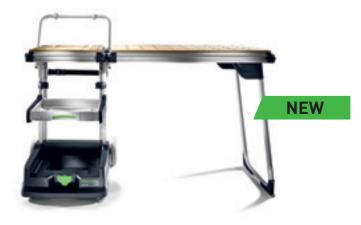

A brand new generation of power distributors.

The new SYS-PowerHub combines all the benefits of a conventional cable drum with the benefits of the Festool Systainer system. With its 10 m cable and four sockets mounted on the exterior, it offers all the freedom that you could need for connecting your power tools.

Mobile workshop

MW 1000

Turns the construction site into your workshop.

- > Easy to transport up and down steps due to the large wheels, which are fully rubber-lined and shock-resistant
- > Handle with adjustable angle, sliding surfaces and recessed grip on the pan for easy loading into a vehicle by one person
- > Compact dimensions and effortless assembly and disassembly
- > Worktops and storage areas with optional customised extension: Simple option of adding multiple multifunction tables and SYSTAINER pull-out drawers

Simply tidier, more clearly arranged and better organised.

SYSTAINER/SORTAINER – can be stacked or connected, are extremely robust and virtually indestructible.

Machines, accessories and consumable materials are protected from dust, water, changes in temperature and heavy impacts. All your sundries and consumables are stored tidily and are easier to transport – size 1 and 2 SYS T-LOC units can even be carried upright with the attachable additional handle (accessory).

SYS-ToolBox - the open SYSTAINER for instant access.

The sturdy design using high-quality plastic provides a maximum load capacity of $7~{\rm kg}$. Two spacious compartments keep your workplace tidy and an open top gives quick access to hand-held tools, consumables and accessories.

Combines three functions.

The central control element of the SYSTAINER: Lock, open, connect with a single turn.

Secure connection.

In combination with a SYSTAINER or a mobile dust extractor, Systainer-Port and Workcenter

Easy to open.

The new SYSTAINER T-LOC can be opened at any time without having to be disconnected.

Everything at a glance – the drawers of the SORTAINER offer lots of space for sundries.

- Individual compartments and additional labelling option for good overview.
- The pull-out catch and individual lock prevent accidental removal of the drawers.
- A range of different sizes and a modular drawer system offer a SORTAINER to suit every requirement.

General notes on the catalogue:

N1

Please remember to fit appropriate protective devices or wear personal protective equipment when using Festool products such as compressed air and electric power tools with accessories and consumable materials or when machining hazardous materials. For further information, please refer to the relevant safety documentation or consult the relevant regulating authority if you have questions.

02

Machine specifications included in the catalogue, such as quantity specifications, time savings, coverage capacities, etc., are average values and may deviate significantly, depending on the material being processed. The manufacturer does not guarantee that the values will be achieved in each individual case. Your Festool specialist dealer will be glad to answer any queries you may have concerning this matter.

03

The machine weights specified in the catalogue usually refer to the weight of a machine ready for use and with a standard tool, but without a cable, accessories or consumables. Please note that the weights stated may deviate from the specifications in the catalogue, depending on the tool, battery pack, accessories or other additional parts used.

04

All trademark rights, patent rights and other commercial property rights mentioned in this catalogue remain the property of the relevant beneficiary, even in cases where this is not explicitly stated. The reproduction in particular of common names, trade names, goods designations, etc. in this catalogue (even if not identified as such) does not render these names exempt from trademark or brand protection legislation and does not therefore authorise anyone to use them.

05

We reserve the right to make modifications, especially to technical data or specifications, without prior notification. Individual features may vary depending on countryspecific conditions.

Products may differ from those shown and the images may at times present components or parts that are not included as standard with the tools. If you have any questions, please contact your Festool specialist retailer.

Safety: All power tools and compressed air tools listed in this catalogue conform to the valid and applicable IEC or EN safety standards, depending on the type of tool (e.g. IEC/EN 61 029, IEC/EN 60 745, IEC/EN 62 841, IEC/EN 60 335, EN ISO 11 148, IEC/CISPR/EN 55 014, IEC/EN 61 000).

08

Insulation: The power tools listed in this catalogue are insulated in accordance with regulations.

CE conformity: All power tools and compressed air tools listed in this catalogue comply with the provisions of the relevant applicable EU directives (e.g. Machinery Directive 2006/42/EC, Low Voltage Directive 2014/35/EU, EMC Directive 2014/30/EU, RoHS Directive 2011/65/EU).

10

ISO certification: All the power tools and compressed air tools listed in this catalogue are manufactured in our production plants which are DIN EN ISO 9001 certified.

The Bluetooth® word mark and the logos are registered trademarks of Bluetooth SIG, Inc.; they are used by TTS Tooltechnic Systems AG & Co. KG, and therefore by Festool, under licence.

Festool catalogue 2019
As at: 01/2019, replaces all previous catalogues.
Subject to alterations and errors. Products may differ from those pictured.

Product performance features

Antistatic function Mobile dust extractors and tools with the antistatic function to prevent static charge

LED spotlight LED light for simple and precise placement against the scribe mark.

Dual-line laser Two laser lines for simple, precision positioning along the scribe mark from the left or right.

Torque shut-off Intelligent technology ensures the optimum screwdriving force for every material.

Jigsaw with precision guidance Long-wearing carbide

from accumulating when

iaws guide the saw blade directly over the cutting location. For precise work results

AUTOCLEAN AUTOCLEAN automatic main filter cleaning system with infinitely adjustable cleaning intervals.

FlowDetect Health protection: The

flow sensor checks for a minimum air sneed of 20 m/sec and issues a warning if the air speed falls below this value.

Spir-O-Cut

single-edged planer head offers crucial advantages: No need to adjust cutting circle diameter after blade replacement, and oblique shearing for high surface quality

Electronic

working.

Speed control for adjusting to all types of materials.

MMC electronics

'Multi Material Control' power electronics with constant adjustable speed and temperature monitor for work on all types of material.

MMC digital electronics

Processor controlled "Multi Material Control" power electronics provide adjustable and constant speeds as well as temperature monitoring for work on all types of material.

PoliStick

Fast fixing concept for attaching polishing felt, polishing sponges or sheepskins – for greater efficiency.

IAS 3 system

Hose system incorporates compressed air, dust extraction and exhaust

IAS 3 light

Dust extraction, compressed air with external exhaust air dissipation.

IAS 3-SD

For connecting a Festool compressed air sander directly to a compressed air line (without dust extraction).

IAS 2-System

Combines three functions in one hose: compressed air supply, exhaust air extraction and dust extraction.

Smooth suction hose

With a smooth exterior which allows it to slide over surfaces perfectly.

Standard connection

Standard connection for dust extractors.

EC-TEC

The EC-TEC drive concept generates an extraordinary amount of power while consuming extremely low amounts of energy.

StickFix

Quick, economical fastening system for abrasives - no adhesives, no clamping.

MPE sanding pad

Sanding pads and sanding discs made from extremely durable materials for long service life

Lithium-ion (Li)

Fitted with highperformance lithium ion battery pack.

Jetstream principle The 9-hole principle

for reduced dust accumulation, less heat and less clogging. Up to a 30 % longer service life.

MULTI-JETSTREAM 2 principle

Sanding system with integral dust conveying concept. With the patented

MULTI- JETSTREAM 2 principle.

SDS-plus Tool holder for quick tool

changes.

AIRSTREAM battery Faster reuse of

battery packs thanks to AIRSTREAM technology (cooling function for faster availability) and significantly increased charging capacity

High torque

Tool with high torque.

Protector

Protects the sanding pad and material when working close to edges.

Impact stop Allows manual

deactivation of the impact function when drilling into wood or brittle materials.

Electronic monitoring Electronic monitoring of the coil temperature protects against damage to the motor.

Splinter guard

Patented splinterguard for splinter-free cuts on both sides when sawing.

Safety sliding clutch Mechanical sliding clutch provides protection if the tool suddenly seizes or tilts

Start/stop function

AUTO mode, also without having to press the main switch

Guide system

Patented guide system for safe guidance of saws and router bits.

Trimming rails

Compound mitre saw system which securely ioins machine and cross cutting guide rails together for precisely accurate repeat cuts.

ErgoFix adapter

For holding a M14 stirring rod.

Quick-acting brake For safe work when

planing, sawing and routing

Makes changing routing, sawing, planing, sanding, drilling and screwdriving tools easier.

Starting current limiter

Simple start for household fuses.

plug it

Removable, replaceable mains cable with safety lock for quick conversion.

CLEANTEC dust extraction
